

**In the Specification:**

Please amend the specification as shown:

Please delete the paragraph on page 7, lines 25 to 28 and replace it with the following paragraph:

The structure of the oligopeptidic sequences must be chosen so as to correspond to that of the active site of the kallikrein. Suitable peptide sequences include -Phe-Arg-Ser-Ser-Arg-Gln- **(SEQ ID NO: 1)** or -Met-Ile-Ser-Leu-Met-Lys-Arg-Pro-Gln- **(SEQ ID NO: 2)** that can be degraded by kallikrein at Lys-Arg or Arg-Ser bonds.
